Which are the most important species for export-oriented aquaculture in India?	Export-oriented aquaculture in India mainly focuses on Shrimp. The Indian species are <i>Litopenaeus vannamei</i> and the indigenous shrimp, <i>Penaeus monodon</i> from
Who is the regulating body of coastal aquaculture in India?	The Coastal Aquaculture Authority regulates the aquaculture farms in the coastal areas. Government farms regulate the farms beyond the coastal areas.
Whether India produces adequate seeds for shrimp aquaculture operations?	Yes, the requirements of the seed for the shrimp aquaculture operations are met by 400 shrimp hatcheries producing the shrimp seeds.
What is the status of the Indian Aquaculture Feed sector?	India has about 35 shrimp feed mills and can meet the shrimp feed requirements
What are the bio-security protocols followed by shrimp farms in India?	The imported shrimp broodstock/seeds are quarantined at the Aquatic Quarantine Station and tested for all OIE-listed pathogens. The shrimp hatcheries follow the guidelines
Does India supply Natural or Organic shrimp?	The traditional shrimp farms in India produce shrimps with the quality of organic shrimps. They depend on natural feed, their produce meets organic standards. Also, India exports organic shrimps
What is the status of Mollusc culture in India?	India has the potential for mollusc cultures such as Edible oysters, Mussels, etc. Mollusc culture is carried out only for Green Mussels in few areas.
Does India produce shrimps from Farm clusters?	Yes, the National Centre for Sustainable Aquaculture, a body under MPEDA, is working on farm clusters for sector-wide management.
How do you ensure that the farmed shrimp is safe for consumption?	The Laboratories established by the Marine Products Export Development Authority test shrimps for the presence of any prohibited pharmacologically active substances. Moreover, the MPEDA is implementing the traceability of the produce. The seeds, farmed shrimp, shrimp feed etc as per the directives of the European Union. The ELISA labs ensure that farmed shrimps tested before harvest. The testing banned antibiotics such as residues of Chloramphenicol and Nitrofurantoin. Forces are also regularly monitoring the aquaculture units locally.
Are Indian aquaculture farms maintaining environmental sustenance?	The Indian aquaculture farms are eco-friendly and conduct sustainable aquaculture. The aquaculture is mainly carried through closed reservoir systems, and the effluents are treated

Are there instructions or guidance documents for shrimp farmers on the use of veterinary medicinal products?	The Coastal Aquaculture Authority (CAA) regulates shrimp farms in the Public Notice dated 14.10.2015 advising farmers and hatchery operators on the use of antibiotics. Besides, The Marine Products Export Development Authority (MPEDA) promotes sustainable aquaculture to farmers conducts village-level campaigns against the use of antibiotics in aquaculture and distributes pamphlets against the abuse of antibiotics in aquaculture.
Is there a list of substances/ materials whose placing on the market or use for animal nutritional purposes is restricted or prohibited?	Yes, a list of twenty antibiotics/ drugs are prohibited by the Coastal Aquaculture Authority (CAA).
Does certified farmed shrimps available for export in India?	Many shrimp farms and exporters are certified under certification schemes. To encourage more farms to adopt certification, a new scheme Shaphari Certification is launched by MPEDA. Certification of Aquaculture Units.
Please list and describe briefly the methods of preserving the quality of farmed shrimp for export?	Chill killing is the normal practice adopted by farmers for killing shrimps and maintaining freshness. Thereafter the harvested shrimps are preserved in ice.
Where can I find suppliers for cooked Vannamei shrimp?	MPEDA has the exporter's directory at the MPEDA website. <p>I'm interested in Imitation Crab Flakes. Could you please share information about the processing methods and packaging options?</p>	<p>Surimi made from imitation crab flakes is a popular seafood substitute.</p> <p>Processing Methods:</p> <ol style="list-style-type: none"> <li>1. Deboning and Filleting: The primary fish used for surimi production, such as white fish, is deboned and filleted to obtain the white fish meat. This meat is low in fat, making it suitable for surimi production.</li> <li>2. Washing and Grinding: The fish meat is thoroughly washed to remove any blood and skin. After washing, the meat is ground into a fine paste to create a uniform texture.</li> <li>3. Filtration and Separation: The ground fish paste undergoes filtration to remove impurities, such as bones and scales. This filtration helps refine the paste and improve its quality.</li> <li>4. Addition of Additives: To enhance the texture, binding properties, and flavor, various additives are incorporated. These can include starches, egg whites, salt, sugar, and flavorings.</li> <li>5. Forming and Shaping: The processed surimi paste is shaped and formed into flakes resembling crab meat. This shaping process gives surimi its characteristic flake-like appearance.</li> </ol> <p>Packaging Options:</p> <ol style="list-style-type: none"> <li>1. Fresh: Imitation crab flakes can be packaged in a fresh form and is commonly found in supermarkets. It is typically packed in sealed containers or vacuum-sealed bags.</li> <li>2. Frozen: Surimi products, including imitation crab flakes, are often available frozen. They are packaged in sealed bags or boxes to preserve their quality and extend their shelf life.</li> <li>3. Pre-packaged: Surimi flakes may also be available pre-packaged in individual portions. These pre-packaged options are convenient for quick and easy use in various recipes.</li> <li>4. Bulk: Foodservice or industrial suppliers often offer surimi flakes in bulk quantities, which are suitable for commercial use in restaurants, cafeterias, or food manufacturing.</li> </ol>

What are their unique characteristics?</p>	<p>Popular pasteurized seafood products include pasteurized crabmeat, lobster, and shrimp. These products share the following unique characteristics:</p> <ol style="list-style-type: none"> <li>1. Extended Shelf Life: Pasteurization extends the product's shelf life, reducing food waste and ensuring freshness.</li> <li>2. Food Safety: Pasteurization kills harmful bacteria, ensuring a safe and hygienic product.</li> <li>3. Convenience: These seafood products are pre-cooked or processed, saving time and effort for consumers.</li> <li>4. Consistency: Pasteurization helps maintain consistent quality, flavor, and texture across different batches.</li> </ol>
<p>Can you share information about the nutritional value and health benefits of Seaweed products?</p>	<p><b>Nutritional Value:</b> Seaweed is a rich source of various nutrients, including vitamins, minerals, and antioxidants. Its nutritional composition may vary depending on the type of seaweed, but it generally offers the following benefits:</p> <ol style="list-style-type: none"> <li>1. Low in calories: Seaweed is relatively low in calories, making it a great addition to a healthy diet.</li> <li>2. High in iodine: Iodine is an essential mineral that plays a crucial role in thyroid function. Seaweed, particularly brown seaweed like kelp, is a significant source of iodine.</li> <li>3. Rich in minerals: Seaweed is abundant in minerals such as calcium, magnesium, and potassium, which are important for various bodily functions.</li> <li>4. High in vitamins: Seaweed contains vitamins such as vitamin C, vitamin E, and B vitamins, including folate.</li> <li>5. Good source of protein: Certain types of seaweed, such as Spirulina and Chlorella, are excellent sources of plant-based protein and essential amino acids.</li> </ol> <p><b>Health Benefits:</b></p> <ol style="list-style-type: none"> <li>1. Rich in antioxidants: Seaweed is packed with antioxidants, including polyphenols and carotenoids, which help protect cells from oxidative stress and may have anti-inflammatory properties.</li> <li>2. Supports thyroid function: Seaweed's high iodine content makes it beneficial for maintaining healthy thyroid function, which regulates metabolism, growth, and development.</li> <li>3. May aid in weight management: Seaweed is low in calories, high in fiber, and contains compounds that may help increase satiety. Incorporating seaweed into your diet can help you feel fuller for longer, potentially assisting in weight management.</li> <li>4. Improves gut health: The fiber present in seaweed can promote a healthy digestive system and support the growth of beneficial gut bacteria.</li> <li>5. Cardiovascular health: Some studies suggest that seaweed consumption may help lower cholesterol levels, improve blood pressure, and improve overall cardiovascular health.</li> <li>6. Potential anti-cancer properties: Certain compounds found in seaweed, such as polyphenols and carotenoids, have shown promising anti-cancer properties in laboratory studies. However, further research is needed to confirm their effectiveness in human subjects.</li> </ol>
<p>What are the different sizes and packaging options available for canned seafood products?</p>	<p>Canned seafood from India are – Tuna chunks in brine/oil, sardine in brine, mackerel in tomato sauce</p>
